

**AMENDMENTS TO THE SPECIFICATION**

Please replace the paragraph beginning on page 17, line 1 as follows.

--- The BER at a Doppler frequency, i.e., a channel change speed (CCS), of 170 (■) is greater than the BER at a channel change speed of 17 (★). The BER at a channel change speed of 500 (▲) is greater than the BER at the channel change speed of 170 (■). Consequently, as is seen from FIG. 16, the BER increases with an increase in a channel change speed. ---

Please also replace the paragraph beginning on page 17, line 18 as follows.

--- As shown in FIG. 17, the BER when the number of carrier waves (NCW) is 2048 (■) is greater than the BER when the number of carrier waves is 1024 (▲), and the BER when the number of carrier waves is 4096 (★) is greater than the BER when the number of carrier waves is 2048 (■). ---
